
Sabinet’s African Journals (SA ePublications) database is a unique collection of southern African and African journal titles. Comprising more than 420 titles, and more than 180 000 full-text articles, it is the biggest collection of its kind.

The African Journal Archive is fully integrated into African Journals (SA ePublications) which brings the combined total of full-text articles to almost 350 000.

The record information (metadata) of the complete African Journals (SA ePublications) is available to all. Anyone can search over the full complement of African Journals (SA ePublications) and will only need authentication when accessing the full text of articles from subscription-based journal titles.

1. **Recommended browsers**

We support the following browsers on Windows and Macintosh platforms:

- IE 7.0 and above
- Firefox 3.0 and above

You should find that all pages are functional in all of the above browsers. However, no two browsers or different versions of a single browser will render all pages identically.

We recommend that you install the latest version of your preferred browser.

2. **How to access**

African Journals (SA ePublications) can be accessed via the following URL: www.journals.co.za

2.1 Bookmark the new page: www.journals.co.za
2.2 Go to www.sabinet.co.za.

From here the following options will allow direct access to the system:

Go to the **Login Button**. Click on **African Journals (SA ePublications) Platform**. Click on **Login via IP Authentication** or type in your Username and Password. This will allow seamless access to the new platform.

3. **How to search**

There are various ways to search on African Journals (SA ePublications) on www.journals.co.za:

3.1) Search across all content
3.2) Advanced search
3.3) Search across a collection
3.4) Search within a journal
3.5) Browse by Topic
3.1 Search across all content

This provides an easy Google-like search option to search across all the full text content within the African Journals (SA ePublications) service. It is available at the top right hand corner of the page.

- Type in your phrase or key word.
- This search option provides **autocomplete functionality** should you want to search on a specific suggested phrase.
You can either hit **Enter** or you can click on the **Go** button to execute your search.

You can start a new search at any time by typing in a new keyword or phrase into the search box which is static and appears on each page.

You can modify your search by clicking on the option on your result page:

- **Modify this search**

### 3.2. Advanced search

You can execute the **advanced search** functionality which offers more options by clicking on the **Advanced Search** option.

- A new search screen will now be available to you with various options.
You will be able to add more fields by clicking on the plus sign.

You can change the field type by clicking on the dropdown menu under All fields. The following fields are available for you to select from:
You can exclude full text from your search by clicking on the Exclude full text? tick box.

You can select to only search on your subscribed titles by selecting the Subscribed titles in the FILTER BY ACCESS TYPES section.

There are various filters available which will assist you in retrieving more relevant results.

3.3 Search across a collection
You will be able to easily search across a specific collection.
- Select the collection from the Collections dropdown menu option on the homepage
Once you have selected a collection e.g. Business and Finance you will now see that the search box in the right hand corner changed to **Search this Collection**. You will now be able to only search content within this collection.

Should you wish to continue **searching across all content** click on the **Home** icon to get the search box.

### 3.4 Search within a journal title

You can select a specific journal title and only search within that specific title.
• When on the **A-Z Publications** menu option (on the homepage), you can select a journal title from the **A-Z index of journals**.

• When you are on the landing page of a specific journal title, you will see that the search box changed to **Search this Journal**. This allows you to search only within this specific journal.

• Should you wish to continue searching across all content click on the **Home** icon to get the search box.

3.5 **Search my subscribed titles**
you can do a search on only the titles that you subscribe to. You must be logged in for this. Click on the right-hand side on the link **Subscribed titles**. This will give you the list of titles that you are subscribed to, whether it is a collection or just single titles.
3.6 **Browse by Topic**

You can browse by a specific topic to find a set of results specific to that topic.
On the Home page go to the # Topics option

Click on the specific topic you wish to browse
A defined search will be done and you will now be able to filter or modify your search.

4. Search Guidance and Tips

4.1 Boolean Searching (AND, OR, NOT)
Boolean AND, OR and NOT are supported, make use of the "+" button to add Boolean fields to your search. Note that there is no need to type the Boolean AND because the system defaults to it. See below and example of how to use the Boolean searching functionality:
4.2 Keyword Searching

When performing a search it is important to choose your keywords correctly. When searching all African Journals (SA ePublications) content it is important to remember that the entire full text of the documents is searchable. Some of the documents are very large. Thus it is important to search wisely when using keywords. If possible it is recommended that you use the correct search strategy like Exact Phrase searching, Boolean operators, dates etc. The keywords, dates and numbers that you use will determine the accuracy of the information that you receive. Always think of synonyms as well.

- **Keywords:** This option allows you to find keywords mentioned in any part of a document, e.g. the full text of the document (if present) or the title of the document.
  - If for example you are looking for information on the SKA project underway in the Karoo region, you could search with the following terms: **ska astronomy**.
  - Keyword searching will locate any category of information that is typed in the **Keywords** search box, e.g. journal title, author affiliation, etc.

- **Exact Phrase:** This allows you to find words typed in that exact order in your results.
  - Please note that the **double inverted commas (" ")** should be used for this purpose.
  - Should you wish to search for two exact phrases, use the Advanced search screen as follows:
Searching by exact phrase will result in fewer but more applicable results.

- **Boolean searching**: This option allows you to combine words in specific ways.
  - **AND**: This is the system default, meaning that in your search strings in the keywords fields you do not have to type the word AND. For example if you are looking for environment AND tourism you can just type in the words environment tourism in the search field. The system will look for the documents which contain both these words.
  - **OR**: If you type in or select the word OR, you will get results with either one of the search terms.
  - **NOT**: This will exclude certain keywords or numbers totally from your search. For example labour relations NOT unions.
    - **NOTE**: when using OR / NOT, the OR or the NOT should be typed in UPPERCASE.
  - **Proximity**: use the ~ to search for words within a certain proximity of each other. For example if you type “meat tenderness” ~4 in the title field, the results will show articles with titles where these words appear within 4 words of one another. Please remember to place keywords in double inverted commas (" "), and to put a space before the ~.
  - **Truncation**: The system allows you to search for all variations of the same word by making use of a wildcard character [*]. If you for example search for ‘regio’, the search results will find records containing region, regions, regional etc.

- **Dates**: Restricting your search by dates on the Advanced Search screen can be very valuable to obtain the correct information.
- **Modify search**: Click on the Modify this search button to modify your current search
- **New search**: Make use of the search box in the right hand top corner to start a new search from any page

5. **Search Results**
The following is an example of a search result screen displaying results from a specific search for labour law and legislation:
Results can be sorted by Relevance, Newest first, Oldest first.

To modify your search click on the Modify this search button.

You can refine your result set by making use of the various FILTER BY options available on the left.

You can share your result set via various options.

You can export citations.

You can select all or some of your results and email it, print it or share it.

You can also start a new search by making use of the search box at the top of the page.

Should you click on the More within the specific record you will see more information about that record and you will have functionality available such as download the document directly, add it to your favourites and email it.

6. How to email results

You can email your search results by ticking the box next to the results to select, and then clicking on the Email Selected Items link:
A pop-up will appear where you can add multiple email addresses separated by a comma, and a subject. A success message will appear once the results have been emailed.

7. **Access keys**
   There are 4 types of access keys available for easy reference of what type of content has been retrieved in your result set:

- **Titles Subscribed To (S)** are journal titles which your institution or you are subscribing to and all the full text will be available for you to download
• Open Access Content (OA) is open access titles and all articles will be available for you to download
• Free Trial Content (T) is content that is made available on a trial access to a specific institution
• Titles Not Subscribed To (N) are journal titles which are subscription titles but you or your institution are not subscribed to it and there only the metadata and abstract will be available to you. The article will however be available to obtain via an e-commerce purchase option

8. Export citations
The following export formats are available: Bibtex, EndNote, Zotero, Plain text, Refworks, and Mendeley. Please ensure that you have these programmes installed.

9. Share options
Share your result set via the following options:
RSS, Facebook, LinkedIn, Twitter, Mendeley, Email, Print and Other like Google, citeulike, Digg, Bibsonomy, Del.iciou.us, Reddit, Research Gate

10. Article result page
When you click on a result, you are taken to the article page with all the metadata available. From here you can go to the next or previous result, or back to your search results. You can
download the fulltext PDF (if you are not subscribed then you can purchase the article through e-commerce). There are additional tabs that give more information about the journal. The various share options and tools are also available on the result page.

11. **My Profile**

"My Profile" is your personal space where you have additional functionality available. Non-subscribers can also manage their account details and orders here. To access your details, click **My Profile** at the top right of any page. You have to register to create your user profile which will be your personal profile with your own user name and password:
After you have created a profile you can sign in to your profile and you will have the following functionality:

- You can access your saved searches and execute them again
- You can view and manage your favourites
- You can manage your alerts, RSS, Social bookmarks
- You can see your search history. Please note that your search history will only remain for your current session, therefore please save the specific search
- Update your profile details, change your profile sign-in details
- If you have made use of the Pay per View option, you can track your order history and change your billing address
- When on your result page, you can save your search to My Profile and you can also create a search alert for this specific search
When you are on Article level you can add favourites to My Profile:

South African Journal of Sports Medicine - Sports medicine news: Rugby neck injuries registry can you contribute?

12. Alerts – Email and RSS feeds
You can create various alerts to assist you to keep up with new content loaded as well as corrections which are done.

**Email Alerts:**
- You need to have **registered your **My Profile** in order to use this functionality and you have to be **signed in.**
- You can **create or manage** your alerts both from the result page as well as the article level page.
- From the result page you can create a **search alert** for the search that you have executed. You will now receive an email alert when new content is added to this specific search.
- From the article level page you can create a content alert by clicking on the **Create Content Alert** link.
- New content alerts are sent within 24 hours of content being added. Site and search alerts are sent weekly. The listing of alerts in **My Profile** allows you to toggle the alert frequency for site, subject and new content alerts e.g. so that you can also receive a monthly digest.
- You can also set up an **alert for content added to a specific journal**. Click on the **Add** next to **Manage TOC Alerts**.
Select the journal, select it and choose your frequency option.

RSS feeds:
- You have to be signed into My Profile in order to set up RSS feeds.
- There are two ways to set up a RSS feed:
  1) When you are on a specific journal landing page, you will have the option to set up a RSS feed:
• Click on the RSS feed icon

2) When you are on a specific article page, you also have the option to click on the RSS feed icon.

13. Device Pairing

A user who is accessing via an institution’s IP access and wishes to be able to make use of this service off campus, should make use of the “Connect Device” option on the right hand side of each page.

• The user needs to enter his/her email to register for pairing
• The email should belong to the valid domain (please contact info@sabinet.co.za for more information)
• The user follows the link sent while on their laptop/tablet/phone.
• This registers the device against the account and a security cookie is enabled on the user’s device

Should you have any question please contact Client Support at info@sabinet.co.za or tel: +27 12 643 9500.
